These forward-looking statements reflect our views with respect to future events as of the date of this prospectus and are based on assumptions and subject to risks and uncertainties. Given these uncertainties, you should not place undue reliance on these forward-looking statements. These forward-looking statements represent our estimates and assumptions only as of the date of this prospectus and, except as required by law, we undertake no obligation to update or review publicly any forward-looking statements, whether as a result of new information, future events or otherwise after the date of this prospectus. We anticipate that subsequent events and developments will cause our views to change. You should read this prospectus and the documents filed as exhibits to the

registration statement, of which this prospectus is a part, completely and with the understanding that our actual future results may be materially different from what we expect. Our forward-looking statements do not reflect the potential impact of any future acquisitions, merger, dispositions, joint ventures or investments we may undertake. ### **Business Overview**

We are a digital asset technology company with a core business of digital infrastructure and energy development to enable sustainable bitcoin mining. TeraWulf's principal business consists of developing and operating bitcoin mining facilities in the United States that are fueled by clean, low cost and reliable power sources. The Company's fully integrated bitcoin mining facilities in the United States use nuclear, hydro and solar energy sources, and currently consume 95% zero-carbon energy to produce bitcoin, with the mission of utilizing 100% zero-carbon energy. TeraWulf began trading on Nasdaq under the symbol "WULF" on December 14, 2021, following its successful strategic business combination with RM 101 Inc. (formerly known as IKONICS Corporation).

#### *Bitcoin Mining*

Bitcoin was introduced in 2008 with the goal of serving as a digital means of exchanging and storing value. Bitcoin is a form of digital currency that depends upon a consensus-based network and a public ledger called a "blockchain," which contains a record of every bitcoin transaction ever processed. The bitcoin network (the "Bitcoin Network") is the first decentralized peer-to-peer payment network, powered by users participating in the consensus protocol, with no central authority or middlemen, that has wide network participation. The authenticity of each bitcoin transaction is protected through digital signatures that correspond with addresses of users that send and receive bitcoin. Users have full control over remitting bitcoin from their own sending addresses. All transactions on the bitcoin blockchain are transparent, allowing those running the appropriate software to confirm the validity of each transaction.

To be recorded on the blockchain, each bitcoin transaction is validated through a proof-of-work consensus method, which entails solving complex mathematical problems (the "hash riddle") to validate transactions and post them on the blockchain. This process is called mining. Bitcoin miners are the work horses of the Bitcoin Network. Miners are rewarded with bitcoins, both in the form of newly-created bitcoins and fees in bitcoin, for successfully validating transactions (a block) by solving the mathematical problems and providing hash computation services to the network and maintaining the bitcoin ledger. Factors such as access to computer processing capacity, interconnectivity, electricity cost, environmental factors (such as cooling capacity) and location play important roles in mining.

Bitcoin miners, such as TeraWulf, invest in a computation network (mining rigs with application-specific integrated circuit ("ASIC") chips and purchase power to probabilistically win the right to validate blocks, and earn bitcoin in return, either through the direct participation on the Bitcoin Network or through participation in a mining pool. The bitcoin reward schedule to the miners represents the supply curve of bitcoin. Bitcoin is a unique commodity with an inelastic supply curve because only 21 million fixed bitcoin can be mined until the year 2140 of which approximately 19.5 million bitcoin have been issued thus far. In addition, the bitcoin reward issued to miners is cut by half every 4 years, which is commonly referred to as the "halving" event. The halving is a software nuance in bitcoin's code that reduces the block reward by 50% after every 210,000 blocks are validated/mined. The first bitcoin block was mined January 3, 2009, and block rewards have declined from 50 bitcoin per block at inception to 6.25 bitcoin per block today, which is expected to decline to 3.125 in or around April 2024, the next anticipated halving date.

Our two bitcoin mining facilities participate in a mining pool operated by Foundry Digital LLC. As of December 31, 2023, our operating mining units are currently producing an average of approximately 5.0 exahash per

second (“EH/s”) of hashrate. In bitcoin mining, “hashrate” is a measure of the computing and processing power and speed by which a mining computer mines and processes transactions on the Bitcoin Network. “Network hashrate” is the total hashrate dedicated to solving the hash riddle. If more miners enter the network, the hashrate increases; higher hashrate means faster riddle resolutions, for a given difficulty level. The bitcoin protocol automatically adjusts the difficulty level higher or lower every 2,016 blocks or approximately every two weeks, which keeps the system in equilibrium with a new block being mined every ten minutes. We are actively expanding our bitcoin mining business and expect to continue increasing our hashrate through 2024 and beyond as we expand our infrastructure at our wholly owned and operated Lake Mariner Facility in the State of New York (the “Lake Mariner Facility”), and seek strategic acquisition targets.

A company’s hashrate is generally considered to be one of the most important metrics for evaluating bitcoin mining companies. We obtain bitcoin as a result of our mining operations, and we sell bitcoin on a daily, weekly, and monthly basis to support our operations and strategic growth. We do not currently plan to engage in regular trading of bitcoin (other than as necessary to convert our bitcoin to U.S. dollars) or to engage in hedging activities related to our holding of bitcoin; however, our decisions to hold or sell bitcoin at any given moment in time may be impacted by the bitcoin market, which has been historically characterized by significant volatility. We do not hold, sell or transact in bitcoin or any other digital assets for anyone other than ourselves.

*TeraWulf Bitcoin Mining Operations*

TeraWulf commenced industrial scale bitcoin mining in March 2022 and is currently mining bitcoin and utilizing predominantly zero-carbon energy resources at two data centers: the Lake Mariner Facility located in upstate New York and the jointly owned Nautilus facility located in central Pennsylvania (the “Nautilus Cryptomine Facility”). As of December 31, 2023, these two industrial scale projects had a combined operating capacity of 5.5 EH/s with approximately 48,900 miners deployed, comprised of 33,100 operational miners at the Lake Mariner Facility (including 4,800 hosted miners) and 15,800 self-miners at the Nautilus Cryptomine Facility.

*The Lake Mariner Facility*

Located at a site adjacent to the now decommissioned coal-fired power plant in Barker, New York, the Lake Mariner Facility began sustainably mining bitcoin in March 2022. As of the date of this prospectus, the Lake Mariner Facility is operating approximately 160 megawatt (“MW”) of bitcoin mining capacity. The Company has an agreement in place with the Power Authority of the State of New York for 90 MW of energy to support its bitcoin mining operations, and the Lake Mariner Facility has the ability to scale up to 500 MW of bitcoin mining capacity.

As of December 31, 2023, we own approximately 30,100 miners, exclusive of the 4,800 hosted miners, of which approximately 28,300 are operational at the Lake Mariner Facility with the remainder undergoing maintenance or on standby to replace miners under repair. These miners are comprised as follows:

<b>Vendor and Model</b>	<b>Number of miners</b>
Bitmain S19 Pro	6,700
Bitmain S19 XP	6,300
Bitmain S19j Pro	11,800
MinerVA M7	4,100
Whatsminer M30S+	1,200
	<u>30,100</u>

Our fleet of miners range in age from 0.4 to 1.6 years and have an average age of approximately 0.8 years. We do not have scheduled downtime for our miners; however, while we periodically perform unscheduled maintenance on our miners, such downtime has not been significant historically. When performing unscheduled maintenance, depending on the length of estimated repair time, we may replace a miner with a substitute miner to limit overall downtime. Our fleet of miners at the Lake Mariner Facility has a range of energy efficiency from 22 to 39 joules per terahash (“j/th”) and has an average energy efficiency of 28.8 j/th.

The majority of our revenue comes from our self-mined bitcoin, which we store and safeguard in a cold storage wallet held by our custodian, NYDIG Trust Company LLC, a duly chartered New York limited liability trust company.

*The Nautilus Cryptomine Facility*

Located in Berwick, Pennsylvania, Nautilus Cryptomine LLC (“Nautilus”) is a joint venture between TeraWulf and a subsidiary of Talen Energy Corporation (“Talen”). Nautilus currently owns a 200 MW bitcoin mining facility located adjacent to the 2.5 gigawatt (“GW”) nuclear-powered Susquehanna Station. The Nautilus Cryptomine Facility represents the first bitcoin mining facility site that is powered by 100% “behind the meter” zero-carbon nuclear energy, which is contracted at a fixed rate of 2.0 cents per kilowatt-hour (“kWh”) for a term of five years with two successive three-year renewal options. Under the Nautilus joint venture agreement, the Company holds a 25% equity interest in Nautilus and Talen holds a 75% equity interest, each subject to adjustment based on relative capital contributions. TeraWulf began mining bitcoin at the Nautilus Cryptomine Facility in the first quarter of 2023 and, as of December 31, 2023, had an allotted 50 MW of bitcoin mining capacity at the Nautilus Cryptomine Facility. On February 28, 2024, the Company exercised its option to increase its energy requirement at the Nautilus Cryptomine Facility by an incremental 50 MW at its own cost (for a total of 100 MW of bitcoin mining capacity attributable to TeraWulf).

As of December 31, 2023, approximately 48,000 miners have been deployed at the Nautilus Cryptomine Facility of which 46,000 are operational with the remainder undergoing maintenance or on standby to replace miners under repair. Approximately 15,800 of the deployed miners are attributed to TeraWulf’s contributions to Nautilus in order to utilize TeraWulf’s allotted 50 MW of bitcoin mining capacity. These miners are comprised as follows:

<b>Vendor and Model</b>	<b>Number of miners</b>
Bitmain S19 Pro	6,300
Bitmain S19 XP	7,100
Bitmain S19j Pro	2,400
	<u>15,800</u>

These miners range in age from 0.7 to 0.8 years and have an average age of approximately 0.8 years. Nautilus does not have scheduled downtime for miners; however, while Nautilus periodically performs unscheduled maintenance on miners, such downtime has not been significant historically. When performing unscheduled maintenance, depending on the length of estimated repair time, Nautilus may replace a miner with a substitute miner to limit overall downtime. These miners have a range of energy efficiency from 22 to 30 j/th and an average energy efficiency of 25.5 j/th. While the Company holds a 25% equity interest in Nautilus, the distributions of mined bitcoin are determined by each of TeraWulf’s and Talen’s respective hashrate contributions. Accordingly, the Company has contributed approximately 1.9 EH/s of a total 5.2 EH/s of miners which results in an approximate 35.7% of the hashrate share attributed to the Company.

*Combined Facilities*

As described above, there are a variety of factors that influence our ability to mine bitcoin profitably, including bitcoin’s value in USD, mining difficulty global hashrate, power prices, fleet energy efficiency, data center energy efficiency and other factors. The energy efficiency of a mining fleet drives profitability, because the most significant direct expense for bitcoin mining is power. We measure efficiency by the joules of energy required to produce each terahash of processing power (“j/th”). We believe we operate a highly efficient fleet of miners. The Company uses the following metrics as indicators of operational progress and effectiveness and believes they are useful to investors for the same purposes and to provide comparisons to peer companies.

The table below presents our miner efficiency and computing power as compared to the global computing power as of December 31, 2023.

Combined facilities <sup>(1)</sup>	As of December 31, 2023
Global hashrate (EH/s) <sup>(2)</sup>	558.4
Miner efficiency (j/th) <sup>(3)</sup>	27.6
TeraWulf combined average operating hashrate (EH/s) <sup>(4)</sup>	5.0
TeraWulf % of Global hashrate	0.9 %

- (1) Results reflect hashrate of mining operations at the Lake Mariner facility and TeraWulf's net share of hashrate produced at the Nautilus Cryptomine Facility.
- (2) Total global hashrate obtained from YCHARTS ([https://ycharts.com/indicators/bitcoin\\_network\\_hash\\_rate](https://ycharts.com/indicators/bitcoin_network_hash_rate))
- (3) Joules of energy required to produce each terahash of processing power
- (4) While nameplate inventory for WULF's two facilities is 5.5 EH/s, inclusive of gross total hosted miners, actual monthly hashrate performance depends on a variety of factors, including (but not limited to) performance tuning to increase efficiency and maximize margin, scheduled outages (scopes to improve reliability or performance), unscheduled outages, curtailment due to participation in various cash generating demand response programs, derate of ASICs due to adverse weather and ASIC maintenance and repair.

As of December 31, 2023 our operating hashrate was approximately 0.9% of the total global hashrate, and we received approximately the same percentage of the global blockchain rewards, which as of that date, equaled approximately 10 to 11 bitcoin per day. Ultimately, in order to mine profitably, we work to ensure that these mining rewards cover our direct operating costs.

The table below presents the average cost of mining each bitcoin, including bitcoin mined at the Lake Mariner Facility and the Company's net share of bitcoin mined at the Nautilus Cryptomine Facility, for the year ended December 31, 2023 and the total energy cost per kWh utilized within the facilities.

- (1) "Cost to mine one bitcoin" is a cash cost metric and does not include depreciation. Although the Company recognizes depreciation with respect to its mining assets, it does not consider depreciation in determining whether it is economical to operate its mining equipment. As a result, the Company does not consider the sunk costs or depreciation of past capital investments in its historical or forecasted breakeven analysis. If depreciation of our miner fleet were factored into the above cost of mining analysis, it would add \$9,892 per bitcoin mined for the year ended December 31, 2023, bringing the total "cost to mine one bitcoin" to \$18,598.
- (2) Computed as the weighted-average opening price of bitcoin on each respective day the mined bitcoin is earned. Excludes bitcoin earned from profit sharing associated with a hosting agreement that expired in February 2024 at the Lake Mariner Facility.

- (3) Excludes bitcoin earned from profit sharing associated with a hosting agreement that expired in February 2024 at the Lake Mariner Facility of 51 bitcoin for the year ended December 31, 2023, respectively, and includes TeraWulf's net share of bitcoin mined at the Nautilus Cryptomine Facility, based on the hashrate share attributed to the Company.
- (4) Excludes energy expenses associated with a hosting agreement that expired in February 2024 at the Lake Mariner Facility and includes TeraWulf's net share of energy expense at the Nautilus Cryptomine Facility, based aggregate nameplate power consumption of deployed miners attributed to TeraWulf's contribution to Nautilus.

Power prices are the most significant cost driver for our bitcoin mining operations, and energy expense represented 33.2% and 29.7% as expressed as a percentage of value of bitcoin mined during the year ended December 31, 2023, respectively.

Energy prices can be highly volatile and global events (including the war in Ukraine and the resulting natural gas shortage) have caused power prices to increase nationwide over the past year. Our wholly-owned Lake Mariner Facility in New York is subject to variable prices and market rate fluctuations with respect to wholesale power costs. Such prices are governed by market power prices and said prices can change hour to hour. While this renders energy prices less predictable, it also gives us greater ability and flexibility to actively manage the energy we consume with an eye towards increasing profitability and energy efficiency. Energy prices are also highly sensitive to weather events, such as winter storms and polar vortices, which increase the demand for power regionally. When such events occur, we may curtail our operations to avoid using power at increased rates or we may be curtailed under demand response programs in which we participate. The average aggregate power prices incurred at the Lake Mariner Facility and the Nautilus Cryptomine Facility during each of the year ended December 31, 2023 was \$0.032 per kilowatt-hour.

The management team makes real-time determinations on the need and timing during which we should curtail. If not otherwise curtailed under demand response programs, we curtail when power prices exceed the value we would receive for the corresponding fixed bitcoin reward. This means if bitcoin's value decrease or energy prices increase, our curtailment will increase; likewise, when bitcoin's value increases and energy prices decrease, our curtailment will decrease. The management team manages this decision on an hour-by-hour basis.

During the year ended December 31, 2023, the Company curtailed operations at Lake Mariner due to weather events, energy price spikes, and demand response program participation. The Company records expected payments to be received for demand response programs as a reduction in cost of revenue, which amounted to \$3.5 million for the year ended December 31, 2023.

The Company has purchased all miners with cash and has not used limited recourse equipment financing to complete its miner purchases. The Company has raised capital through both the issuance of equity and corporate level debt. These funds have been utilized to support operations, invest in our joint venture and purchase miners and other fixed assets. Costs related to such issuances are not included in this analysis. Additionally, miner acquisition costs, or capital expenditures, are not factored into the above cost of mining analysis as capital expenditures do not impact the marginal cost of production of one bitcoin. Miner acquisition costs, or capital expenditures, are recorded at cost in property, plant and equipment in the consolidated balance sheets. Depreciation of property, plant and equipment is computed using the straight-line method over the estimated useful lives of the equipment: generally 4 years for miners and 5 years for computer equipment. While we currently depreciate our miners over a 4-year period, given our historical low cost of power (\$0.032 per kilowatt-hour for the year ended December 31, 2023), it is possible the average actual useful life of our miners may exceed the depreciation period in certain circumstances. Nevertheless, if depreciation of our miner fleet were factored into the above cost of mining analysis, it would add \$9,892 per bitcoin mined in the year ended December 31, 2023.

The estimation of asset useful lives requires management judgement, including consideration of historical operating data, which is limited in the industrial-scale bitcoin mining space given the advent of next-generation mining rigs primarily used by the Company's bitcoin mining operations. Depreciation periods can be adjusted periodically if an event, regulatory action, or change in retirement patterns indicates an update is necessary. Additionally, management considers expected future energy market prices and conditions, operating costs, maintenance practices and capital investment requirements in determining the estimated useful lives of our equipment and reassesses the reasonableness of estimated useful lives whenever events or changes in circumstances warrant. When a determination has been made that an asset will be retired or extended before or after the end of its

current estimated useful life, depreciation provisions will be accelerated or extended to reflect the shortened or lengthened estimated useful life, which could have a material unfavorable or favorable impact on future results of operations.

### Warrants

We entered into the Warrant Agreement, pursuant to which we have issued: (i) 27,759,265 Penny Warrants to purchase 27,759,265 shares of Common Stock at an exercise price of \$0.01 per share of Common Stock and (ii) 13,879,630 Dollar Warrants to purchase 13,879,630 shares of Common Stock at an exercise price of \$1.00 per share of Common Stock. As of March 19, 2024, 41,638,895 Warrants to purchase a total of 41,638,895 shares of Common Stock were issued and outstanding.

The exercise period for the Penny Warrants is the period beginning on April 1, 2024 and ending at 5:00 p.m., New York City time, on December 31, 2025, and the exercise period for the Dollar Warrants is the period beginning on April 1, 2024 and ending at 5:00 p.m., New York City time, on December 31, 2026.

The Penny Warrants and the Dollar Warrants will become automatically exercisable if we effect a recapitalization, reclassification of our stock (subject to exceptions), consolidation or merger, sale or lease of all or substantially all of our assets (on a consolidated basis) or capital stock, or other similar transaction, subject to the terms of and as further described in the Warrant Agreement.

The number of Penny Warrant Shares and the Dollar Warrant Shares (collectively, the “Warrant Shares”) may be adjusted if we (i) make or declare a dividend or other distribution (in part or in full) on our outstanding shares of Common Stock payable in equity interests of the Company, (ii) subdivide our shares of Common Stock into a greater number of shares of Common Stock, or (iii) combine (by combination, reverse split or otherwise) our outstanding shares of Common Stock into a smaller number of shares of Common Stock, as more fully described in the Warrant Agreement. Upon any such adjustment of the number of Warrant Shares, the applicable exercise price for a Warrant Share will be adjusted concurrently to equal the product of (a) \$0.01 or \$1.00, as applicable (unless the applicable exercise price has been previously adjusted), times (b) a fraction, of which the numerator is the total number of Warrant Shares subject to issuance upon exercise of the applicable Penny Warrant or Dollar Warrant prior to giving effect to the adjustment and the denominator is the total number of Warrant Shares subject to issuance upon such exercise as so adjusted.

#### **Limitation on Liability of Directors and Officers**

We are a Delaware corporation. Our amended and restated certificate of incorporation provides that no director is personally liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director, except as required by applicable law, as in effect from time to time. Currently, Delaware law requires that liability be imposed only for the following:

- any breach of the director’s duty of loyalty to our company or our stockholders;
- any act or omission not in good faith or which involved intentional misconduct or a knowing violation of law;
- unlawful payments of dividends or unlawful stock repurchases or redemptions as provided in Section 174 of the Delaware General Corporation Law (the “DGCL”); and
- any transaction from which the director derived an improper personal benefit.

As a result, neither we nor our stockholders have the right, including through stockholders’ derivative suits on our behalf, to recover monetary damages against a director for breach of fiduciary duty as a director, including breaches resulting from grossly negligent behavior, except in the situations described above.

Our amended and restated certificate of incorporation provides that, to the fullest extent permitted by law, we will indemnify any officer or director of our company in connection with any threatened, pending or completed action, suit or proceeding to which such person is, or is threatened to be made, a party, whether civil or criminal, administrative or investigative, arising out of the fact that the person is or was our director or officer, or served any other enterprise at our request as a director or officer. We will reimburse the expenses, including attorneys’ fees, incurred by a person indemnified by this provision in connection with any proceeding, including in advance of its final disposition, to the fullest extent permitted by law. Amending this provision will not reduce our indemnification obligations relating to actions taken before an amendment.

We maintain insurance for our officers and directors against certain liabilities, including liabilities under the Securities Act, under insurance policies, the premiums of which are paid by us. The effect of these is to indemnify any officer or director of the Company against expenses, judgments, attorney’s fees and other amounts paid in settlements incurred by an officer or director arising from claims against such persons for conduct in their capacities as officers or directors of the Company.

## **Anti-Takeover Effects of Our Certificate of Incorporation and Bylaws and Delaware Law**

Some provisions of our amended and restated certificate of incorporation and amended and restated bylaws and Delaware law could make the following more difficult:

- acquisition of us by means of a tender offer;
- acquisition of us by means of a proxy contest or otherwise; or
- removal of our incumbent officers and directors.

These provisions, summarized below, are expected to discourage coercive takeover practices and inadequate takeover bids. These provisions are also designed to encourage persons seeking to acquire control of us to first negotiate with our board of directors. We believe that the benefits of increased protection give us the potential ability to negotiate with the proponent of an unfriendly or unsolicited proposal to acquire or restructure us and outweigh the disadvantages of discouraging those proposals because negotiation of them could result in an improvement of their terms.

### ***Size of Board and Vacancies***

Our amended and restated certificate of incorporation provides that our board of directors shall consist of not less than three (3) nor more than ten (10) members, which number is determined by resolution of our board of directors. Directors are elected at each annual meeting of stockholders by the vote of a majority of the shares present. Except for directors elected by the holders of any series of preferred stock, any director or our entire board of directors may be removed from office at any time, with or without cause, but only by the affirmative vote of a majority of the total voting power of the outstanding shares of capital stock entitled to vote generally in the election of directors, voting together as a single class. Newly created directorships resulting from any increase in our authorized number of directors or any vacancies in our board of directors resulting from death, resignation, retirement, removal from office or other cause shall be filled solely by the affirmative vote of a majority of the remaining directors then in office, even though less than a quorum of our board of directors, or by a sole remaining director.

### ***Stockholder Meetings***

Under our amended and restated bylaws, special meetings of our stockholders may be called at any time by, and only by, (i) our board of directors, (ii) at any time prior to the first date on which Stammtisch and Stammtisch Affiliates (each as defined therein) cease to beneficially own in the aggregate (directly or indirectly) shares of capital stock entitled to vote generally for the election of our directors representing at least fifteen percent (15%) of such shares of capital stock owned by Stammtisch and Stammtisch Affiliates, by the chairperson of our board of directors upon written request by Stammtisch delivered in writing to our board of directors, or (iii) the Secretary upon proper written request given by or on behalf of one or more stockholders who hold at least fifty percent (50%) of the voting power of all outstanding shares of Common Stock.

### ***Requirements for Advance Notification of Stockholder Nominations and Proposals***

Our amended and restated bylaws establish advance notice procedures with respect to stockholder proposals and nomination of candidates for election as directors other than nominations made by or at the direction of our board of directors or a committee of our board of directors.

### ***Delaware Anti-Takeover Law***

We are subject to Section 203 of the DGCL, an anti-takeover law. In general, Section 203 prohibits a publicly held Delaware corporation from engaging in a business combination with an interested stockholder for a period of three (3) years following the date such person became an interested stockholder, unless the business combination or the transaction in which such person became an interested stockholder is approved in a prescribed manner. Generally, a “business combination” includes a merger, asset or stock sale, or other transaction resulting in a financial benefit to the interested stockholder. Generally, an “interested stockholder” is a person that, together with

affiliates and associates, owns, or within three (3) years prior to the determination of interested stockholder status did own, fifteen percent (15%) or more of a corporation's voting stock. The existence of this provision may have an anti-takeover effect with respect to transactions not approved in advance by our board of directors, including discouraging attempts that might result in a premium over the market price for our Common Stock.

***No Cumulative Voting***

Neither our amended and restated certificate of incorporation nor our amended and restated bylaws provide for cumulative voting in the election of directors.

**Forum for Adjudication of Disputes**

Our amended and restated certificate of incorporation provides that unless we consent in writing to the selection of an alternative forum, and subject to applicable jurisdictional requirements, the sole and exclusive forum for (1) any derivative action or proceeding brought on behalf of TeraWulf, (2) any action asserting a claim of breach of a fiduciary duty owed by any current or former director, officer, employee, agent or stockholder of TeraWulf to TeraWulf or our stockholders, (3) any action asserting a claim arising pursuant to any provision of the DGCL, the amended and restated certificate of incorporation or the amended and restated bylaws, or (4) any action asserting a claim governed by the internal affairs doctrine shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery of the State of Delaware lacks jurisdiction over such action or proceeding, then another court of the State of Delaware or, if no court of the State of Delaware has jurisdiction, then the United States District Court for the District of Delaware). Our amended and restated certificate of incorporation also provides that, unless TeraWulf consents in writing to the selection of an alternative forum, the federal district courts of the United States will be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act. The exclusive forum provisions set forth in our amended and restated certificate of incorporation do not apply to suits brought to enforce a duty or liability created by the Exchange Act or any other claim for which the federal courts have exclusive jurisdiction.

**Transfer Agent and Registrar**

Our transfer agent and registrar is Equiniti Trust Company.

***Listing***

Our Common Stock is listed on The Nasdaq Stock Market LLC under the ticker symbol "WULF."

## PLAN OF DISTRIBUTION

The Selling Stockholders and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their Shares covered hereby on any of the NYSE American, the Nasdaq Capital Market, the Nasdaq Global Market, the Nasdaq Global Select Market or the New York Stock Exchange (or any successors to any of the foregoing) or any other stock exchange, market or trading facility on which our Common Stock is traded or in private transactions. These sales may be at fixed or negotiated prices. The Selling Stockholders may use any one or more of the following methods when selling the Shares:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the Shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- settlement of short sales;
- in transactions through broker-dealers that agree with the Selling Stockholders to sell a specified number of the Shares at a stipulated price per share;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- a combination of any such methods of sale; or
- any other method permitted pursuant to applicable law.

The Selling Stockholders may also sell the Shares under Rule 144 or any other exemption from registration under the Securities Act, if available, rather than under this prospectus.

Broker-dealers engaged by the Selling Stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the Selling Stockholders (or, if any broker-dealer acts as agent for the purchaser of the Shares, from the purchaser) in amounts to be negotiated, but, except as set forth in the applicable prospectus supplement, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with FINRA Rule 2121 and, in the case of a principal transaction, a markup or markdown in compliance with FINRA Rule 2121.

In connection with the sale of the Shares or interests therein, the Selling Stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the Shares in the course of hedging the positions they assume. The Selling Stockholders may also sell the Shares short and deliver the Shares to close out their short positions, or loan or pledge the Shares to broker-dealers that in turn may sell the Shares. The Selling Stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or create one or more derivative securities which require the delivery to such broker-dealer or other financial institution of the Shares offered by this prospectus, which Shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The Selling Stockholders and any broker-dealers or agents that are involved in selling the Shares may be deemed to be “underwriters” within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the Shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. Each of the Selling

Stockholders has informed the Company that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the Shares.

The Company is required to pay certain fees and expenses incurred by the Company incident to the registration of the Shares offered by this prospectus. The Company has agreed to indemnify the Selling Stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act.

We agreed to keep this prospectus effective until the earlier of (a) the date on which the Shares may be resold by the Selling Stockholders without registration and without regard to any volume or manner-of-sale limitations by reason of Rule 144, without the requirement for the Company to be in compliance with the current public information under Rule 144 under the Securities Act or any other rule of similar effect or (ii) all of the Shares have been sold pursuant to this prospectus or Rule 144 under the Securities Act or any other rule of similar effect. The resale securities will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale securities covered hereby may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Exchange Act, any person engaged in the distribution of the resale securities may not simultaneously engage in market making activities with respect to the Common Stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the Selling Stockholders will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of the Shares by the Selling Stockholders or any other person. We will make copies of this prospectus available to the Selling Stockholders and have informed them of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act).

**Item 15. Indemnification of Directors and Officers.**

The Registrant is incorporated under the laws of the State of Delaware. Section 102(b)(7) of the Delaware General Corporation Law allows a corporation to provide in its certificate of incorporation that a director of the corporation will not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except where the director breached the duty of loyalty, failed to act in good faith, engaged in intentional misconduct or knowingly violated a law, authorized the payment of a dividend or approved a stock repurchase in violation of Delaware corporate law or obtained an improper personal benefit. The Registrant's Certificate of Incorporation provides for this limitation of liability.

Section 145 of the Delaware General Corporation Law provides that a Delaware corporation may indemnify any person who was, is or is threatened to be made party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided such person acted in good faith and in a manner he reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his or her conduct was illegal. A Delaware corporation may indemnify any persons who are, were or are threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation by reason of the fact that such person is or was a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit, provided such person acted in good faith and in a manner he reasonably believed to be in or not opposed to the corporation's best interests, provided that no indemnification is permitted without judicial approval if the officer, director, employee or agent is adjudged to be liable to the corporation. Where an officer or director is successful on the merits or otherwise in the defense of any action referred to above, the corporation must indemnify him against the expenses which such officer or director has actually and reasonably incurred.

The Registrant's second amended and restated certificate of incorporation provides that its officers and directors will be indemnified by us to the fullest extent authorized by Delaware law, as it now exists or may in the future be amended. In addition, the Registrant's second amended and restated certificate of incorporation provides that the Registrant's directors will not be personally liable for monetary damages to the Registrant for breaches of their

fiduciary duty as directors, except for liability (i) for any breach of the director's duty of loyalty to the Registrant or stockholders of the Registrant, (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (iii) under Delaware law, or (iv) for any transaction from which the director derived an improper personal benefit.

The indemnification rights set forth above shall not be exclusive of any other right which an indemnified person may have or hereafter acquire under any statute, provision of the Registrant's second amended and restated certificate of incorporation or bylaws, agreement, vote of stockholders or disinterested directors or otherwise.

**Item 16. Exhibits.**

See Exhibit Index attached to this registration statement, which is incorporated by reference herein.

**Item 17. Undertakings.**

The undersigned registrant hereby undertakes:

- (1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
    - (i) To include any prospectus required by Section 10(a)(3) of the Securities Act;
    - (ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in the volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) of the Securities Act if, in the aggregate, the changes in volume and price represent no more than 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and
    - (iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement; provided, however, that paragraphs (1)(i), (1)(ii) and (1)(iii) above do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the SEC by the registrant pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934, or the Exchange Act, that are incorporated by reference in the registration statement or is contained in a form of prospectus filed pursuant to Rule 424(b) that is part of the registration statement.
  - (2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.
  - (3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.
  - (4) That, for the purpose of determining liability under the Securities Act to any purchaser:
    - (i) Each prospectus filed by the registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement; and
    - (ii) Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5) or (b)(7) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to
-

Rule 415(a)(1)(i), (vii) or (x) for the purpose of providing the information required by Section 10(a) of the Securities Act shall be deemed to be part of and included in the registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of the registration statement relating to the securities in the registration statement to which this prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such effective date, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such effective date.

- (5) That, for purposes of determining any liability under the Securities Act, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Exchange Act) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of the securities at that time shall be deemed to be the initial bona fide offering thereof.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.
